

Job Title – Graduate Design Engineer

Hewland are looking for a hardworking, professional and forward thinking Graduate Design Engineer to work alongside an experienced engineering team, designing the latest motorsport transmissions.

Founded in 1957, Hewland Engineering Ltd provides transmissions to a global customer base, to almost every motorsport discipline and to an increasing number of specialist applications.

Manufacturing capabilities include state of the art Turning, Milling, Gear Cutting, Heat Treatment and Grinding, including Gear Grinding. Our engineers use the latest design and analysis software and CAE tools to support our customer and new product development programmes.

Essential skills and requirements;

- 3D CAD Experience
- Mechanical, Motorsport or relevant Engineering Degree
- Effective communication
- Strong IT skills
- Problem solving
- High attention to detail

Desirable Skills:

- Experience designing or working with transmissions
- Strong mechanical understanding of sequential gearboxes

Location: White Waltham, Berkshire

Job Type: Permanent

Salary: Competitive
