

Job Title – Mechanical Inspector

Hewland are looking for a professional Mechanical Inspector to work alongside an experienced team, manufacturing components used to build high-quality racecar transmissions.

Founded in 1957, Hewland Engineering Ltd provides transmissions to a global customer base, to almost every motorsport discipline and to an increasing number of specialist applications.

The role comprises liaising with suppliers/customers where necessary (Quality Issues/Paperwork/Etc.) Applied duties include calibrating a range of hand equipment/gauges, documentation and organising calibration systems and conducting of root cause analysis across and range of quality tools and techniques to ensure that the manufacturing process meets customer requirements.

Essential skills and requirements;

- Calibration experience
- Manual inspection techniques
- Experience working with mechanical components
- Ability to interpret engineering drawings and specifications
- Industry relevant qualifications
- Good understanding of lean manufacturing principles and Root Cause Analysis

Desirable Skills:

- ISO9001:2015 experience
- ISO14001 experience
- CMM experience
- Apprenticeships or being time-served is advantageous but not essential
- MPI (Magnetic Particle Inspection) experience
- NI (Nital etching)
- Experience of maintaining a mechanical system
- Creating and uploading QA paperwork (e.g. Certificates of Conformity)

Location: White Waltham, Berkshire

Job Type: Permanent

Salary: Competitive
