

Job Title – Purchasing Manager

Hewland are looking for a professional Purchasing Manager to work alongside an experienced team, procuring components used to build high-quality race car and performance vehicle transmissions.

Founded in 1957, Hewland Engineering Ltd provides transmissions to a global customer base, to almost every motorsport discipline and to an increasing number of specialist applications.

This role comprises leadership of procurement strategy to ensure on time delivery of bought out components and raw materials at a competitive cost base that represents value to the business. This is in addition to the development and monitoring of a supply chain structure that delivers continuous improvement in delivery, quality and cost and supports annual productivity and purchase price variance targets.

Essential skills and requirements;

- Appropriate academic qualification/experience base
- Demonstrable minimum 5 years' experience in a precision manufacturing environment.
- Strong supply chain/ purchasing background
- Logical and structured thinker with an ability to define and manage project and action plans.
- A passion for customer service
- Commercially and financially aware
- An ability to build teams and develop key members via delegation, coaching, and mentoring.

Desirable Skills:

- Experience within a precision component manufacturing environment.
- Degree qualified in a relevant discipline

Location: White Waltham, Berkshire

Job Type: Permanent

Salary: Competitive
